

direction generally perpendicular to the cable pathway while maintaining the cable minimum bend radius;

wherein, when mounted to the lateral trough, the bottom and side wall surfaces of the cable trough define a cable pathway that leads over the upstanding side of the lateral trough section.

⁶⁷
~~65~~. (New) The cable trough of claim ⁵⁷~~64~~ wherein the bottom surface extends from inside the lateral trough section to outside the lateral trough section.

⁵⁷
66. (New) The cable trough of claim ~~64~~ wherein the curved portion of the bottom surface is a first curved portion and wherein the bottom surface includes a second curved portion leading in a downward direction relative to the lateral trough section while maintaining a cable minimum bend radius.

⁵⁷
⁶⁴
~~67~~. (New) The cable trough of claim ~~64~~ wherein the cable trough is releasably mountable to the lateral trough section.

⁶⁴
⁶⁵
~~68~~. (New) The cable trough of claim ⁶⁴~~67~~ wherein the curved portion of the bottom surface is a first curved portion and wherein the bottom surface includes a second curved portion leading in a downward direction relative to the lateral trough section while maintaining a cable minimum bend radius.

⁵⁸
⁵⁷
~~69~~. (New) The cable trough of claim ~~64~~ wherein the side wall surface is a first side wall surface and wherein the cable trough further includes a second side wall surface extending from the bottom surface and spaced from the first side wall surface, the second side wall surface having a curved portion which leads from a direction generally parallel to the cable pathway toward a direction generally perpendicular to the cable pathway while maintaining the cable minimum bend radius.

⁵⁸
⁵⁹
~~70~~. (New) The cable trough of claim ~~69~~ wherein the curved portion of the bottom surface is a first curved portion and wherein the bottom surface includes a second curved portion leading in a

downward direction relative to the lateral trough section while maintaining a cable minimum bend radius.

60
61 71. (New) The cable trough of claim *58* wherein a portion of the second side wall surface opposes a portion of the first side wall surface.

61 72. (New) The cable trough of claim *57* further including a curved upper surface extending from the cable trough over a bottom of the lateral trough section when the cable trough is mounted to the lateral trough section.

62 73. (New) The cable trough of claim *61* wherein the upper surface extends perpendicularly from the side wall surface.

63 74. (New) The cable trough of claim *62* further comprising a flange depending downwardly from the upper surface.
